KADEEM CHERMAN

FULLSTACK DEVELOPER

647-612-5016 | CANADA, CALGARY, AB | KASSIE35DEV@GMAIL.COM |
HTTPS://GITHUB.COM/KASSIESANISCLAWS

Objective

"Motivated and detail-oriented Software Developer with a proven track record of designing, developing, and implementing software solutions to meet complex business requirements. Proficient in multiple programming languages such as C#, JavaScript, and SQL, with hands-on experience in various frameworks and technologies including .NET, React.js, and Node.js. Dedicated to staying up to date with industry trends and best practices to deliver high-quality, scalable, and efficient code. Seeking a challenging role where I can leverage my technical expertise, problem-solving skills, and passion for innovation to contribute to the success of the team and organization."

Skills & abilities

C# | Html5 | Css3 | Sass + Scss | Styled Components | Bootstrap | JavaScript | Opp | Type Script | Redux | Redux toolkit | ReactJs | NodeJS | ExpressJs | ExpressJs Middleware | Mvc | .Net | .Net Core | MongoDB | SQL | NoSQL | Php | Git | System Design | Design Patterns | Industrious | Self-Starter | Jwt | Sessions | Authentication | Authorization | Team Player | Problem Solving | Microsoft Azure | Maui | CI/CD | Agile | Scrum | Analysis skills | Restful Api's | Debugging | Mern Stack | Self-taught programmer | Business Requirements | Figma | GitHub | AWS | Web Accessibility, and more .

Experience

TRIOS COLLEGE BUSINESS TECHNOLOGY HEALTHCARE INC.

Applications Development Instructor | June 2024 – Current

- Teaching the assigned course curriculum.
- Share career experiences and knowledge.
- Stay current with and up to date with the material and technologies being taught along with my experiences.
- Provide encouragement and constructive criticism with feedback to the students.
- Assist the students with their career goals and help them better align with them.
- Submit grades, projects, and manuals within five business days.
- Recordings of lectures and instructional activities.
- Attend mandatory staff meetings.
- LinkedIn learning.
- IOS Development building mobile data driven applications.
- Swift UI.
- Android development.
- Android Studio, Kotlin & Java building out data persistent applications.
- Career Management.
- Code review.
- Problem Solving different applications software.

BUREAU VERITAS

Web Developer | December 2022 – August 2023

- Develop and maintain responsive, user-friendly, and visually appealing websites using programming languages.
- Collaborate with cross-functional teams to optimize website performance, user experience, and SEO.
- Planned, proposed, designed, and implemented new features and improved and maintained legacy features.
- Integrate & build features to requirements and designs according to Figma.
- Testing and debugging feature components in UI.
- Performed standups and updates in an Agile methodology environment.
- Worked to achieve strict deadlines.
- Collaborated with external company contractors to work on multiple different projects.
- Provided solutions for complex business logic-related challenges.
- Translated PCDs (Project Control Document) into designs and business logic for new features.
- Communicated efficiently and in a timely manner when faced with working challenges and escalated to my manager when needed according to company policies.
- Contributed to Api features and bug fixes.
- Involved in developing, improving features and bug fixes in Microservices application.
- Documentation of implemented features, bug fixes, and proposed solutions.
- Cypress regression testing.
- Deployed newest version releases to network server for BA testing.
- Endpoints tested using postman.
- AWS S3 bucket certification.
- Performed testing backend functionalities, ensuring reliability, scalability, and performance.

PHOENIX MATES TECHNOLOGIES INC.

Junior Full Stack Developer | November 2020 – December 2022

- Built and maintained scalable and secure web applications.
- Mentoring/ Teaching intern developers.
- Tutoring various students online and in person contributes to learning and development.
- My ability to teach and mentor exemplifies my deep understanding of technologies worked with.
- Designed and implemented custom CMS solutions to meet clients' unique requirements, resulting in increased efficiency and user engagement.
- Collaborate with cross-functional teams to optimize website performance, user experience, and SEO.
- Improved and maintained legacy features.
- Research, Design, Implement and present system design ideas for new application development.
- Cypress regression testing.
- Design, Implement and developed Nodejs backend applications with Type Script, JWT, ExpressJs, MongoDB and SQL.
- Developed responsive user-friendly rich applications using React best practices and updated features.
- Tested, documented, and suggested solutions to bugs within applications.
- Performed scrum standups and Agile methodology environment.
- Endpoints tested utilizing API testing software.
- Extensive documentation on web applications development processes.
- Integrated & built features to requirements and designs according to Figma.

- Integrated custom business logic according to PCD documentation.
- Design and present application components using Figma.
- Proficient in backend development using C#, ASP.NET technologies to build robust and scalable web applications.
- Implemented token-based authentication and security measures using JWT and refresh token.
- Developed and deployed RESTful APIs with seamless communication between frontend and backend applications.
- Designed and implemented database management in SQL/ no SQL optimization.
- Performed testing backend functionalities, ensuring reliability, scalability, and performance.

BREEZEMAX-WEB.

Junior Developer | June 2021 – October 2021

- Built and maintained scalable and secure web applications.
- Performed standup scrum methodology environment.
- Design implemented and developed React applications.
- Tested, documented, and implemented solutions to bug fixes in legacy features applications.
- Research and implement solutions to legacy applications bottleneck.
- Design and implement monolithic application solutions.
- Collaborated with cross-functional teams to optimize website performance, user experience, and SEO.
- Research and design store applications with ReduxJs.
- Implemented designs and business logic for new features according to PCD's (Project Control Document).
- Implemented and developed backend NodeJS applications with user validation security features and tokens.
- Designed styled react custom components for legacy application features.
- Developed and maintained responsive, user-friendly, and visually appealing application websites.

Education

TFS (TORONTO FILM SCHOOL)

Toronto, ON | Video Game Design & Development Program

Currently a 2.93 GPA and completed relevant coursework data structures and algorithms, programming fundamentals, Mathematics for game programmers.

CBC (CANADIAN BUSINESS COLLEGE)

Mississauga, ON | Software Engineering

Earned a 94% GPA and completed relevant coursework in web applications, Microsoft SQL database development, Data Access, JavaScript, Ajax & Jquery, C# programming, Windows applications, XHTML & XML.

TRIOS COLLEGE

Mississauga, ON | Enterprise Web & Mobile Applications Development + Internship

Earned an 89% GPA graduating with honors and completed relevant coursework in web development, Linux & Apache, Asp.Net, C# Development, iPhone Development, Php programming, SQL programming, python programming, Jquery, CMS development, java programming & Android development.

Communication

Excellent communication skills enable me to collaborate with clients, stakeholders, and cross-functional teams to deliver high-quality results.

Leadership

Mentor junior developers, coordinate project tasks, and implement best practices to ensure timely delivery of high-quality web applications.
